

125 AD

The AQUA TEPULA was built.  
Poured concrete replaced stone  
as the preferred building material.  
Pipes made of stone, clay, lead,  
or wood channeled the water  
underground and many of these  
systems employed the siphon principle  
used in modern conduits.

Q125

Spread of Gnosticism.

One gnostic thesis denied the divinity of Christ; others denied the reality of his humanity.
